TECHNICAL SKILLS.

Languages and programing

1. HTML
2. CSS
3. JavaScript
4. JQuery
5. Moment.js
6. API and DOM
7. Node.JS

PROJECTS

Mood-Me | [Link to GitHub](#) | [Link to Deployed Project](#)

1. This project was created to respond to people's moods with providing music or a movie clip
2. Using API's and JavaScript to respond to users input, the API calls in the request, and outputs it into the HTML using JavaScript
3. While working on this project, I was tasked with the HTML and CSS aspects. I also researched the material on different clinical studies of emotions, and the response they have with music/ movies.

Work Day Scheduler | [Link to Github](#) | [Link to Deployed Project](#)

1. Work Day Scheduler is an application used to store activities by the hour on a planner. It has a color coordination with the actual time. So you know what hour it is
2. Using moment.js for a timer to incorporate code into the JavaScript. I also created an actual timer that shows the exact time.

Password Generator | [Link to Github](#) | [Link to Deployed Project](#)

1. This work was used to create a random password using multiple different characters.

2. In this application, Javascript was used to incorporate a new password every single time used. It also cycles through letters, numbers and special characters.
- 3.
